

## 2 Quarter Specials for Spring Diamond Burs

**BUY ANY 2-25/PACKS OF SPRING FG DIAMONDS AND RECEIVE 1 ZIRCONIA CUTTER KIT FREE!**

Spring's Single Patient diamond burs provide a fresh, fast-cutting bur every time while improving infection control, expediting procedures, reducing patient trauma and decreasing handpiece wear and tear.

A sharper tool every time!

Cuts like a new multi-use bur at a fraction of the cost!  
Diamonds stay sharp with no decrease in cutting efficient.

Always a fast, smooth, vibration free cut!

Premium Diamonds Get the Best and stop paying More for LESS!

### SPRING DIAMOND BENEFITS: Get the Best and why pay MORE! Here is why:

- **Highest quality all-natural Diamonds**, blocky in shape, tougher and longer lasting.
- **Uniform diamond partial size for better cutting**, smoother preparations and less vibration.
- **True Super Coarse Grit** - a claim most competitors cannot state. Plating 180µ is not easy. The bur cuts much fast with larger grits.
- **Precision tip coverage**-Spring Diamonds always cut crisp clear margins.

**FASTEST & SHARPEST CUT! LESS CHAIRTIME, LESS TOOTH TRAUMA** Spring's Advanced Diamond Bonding Technology secures diamonds to the shank with maximum staying power thus ensuring that there is NO loss of diamonds.

**CONCENTRIC SHANK = NO WALK-OUT** Concentric bur Shanks that are micro-precisely calibrated with the strictest tolerances on shank diameter in the industry for a secure fit giving a smooth, fast cut with no chatter or vibration.

**TURBO DIAMONDS** Spring turbo diamonds can reduce chair time by eliminating the use of an additional instrument. Spiral design cuts a smooth axial wall as a single instrument - diamond-free cooling zones allow the cooling water to flow for use in the bulk reduction required for crown preps and little or no finishing is required.
